(SUPPLIER)

SCOPE OF WORK

Supplier agrees to supply, deliver and Install on truck to site one Air Structure and components. Air structure will be approximately 500' long x 250' wide x 75' high, plan as per finished drawings which will be signed and confirmed by Purchaser; and the Purchaser agrees to pay for such structure including the following:

1) **FABRIC MEMBRANE:**

- a. **Outer Fabric:** vinyl coated **Opaque** polyester fabric with acrylic exterior top-coating. The exterior surface colour of the fabric will be white. Note: DuPont TEDLAR can be added as an optional upgrade if requested. Tedlar will keep the dome looking “newer” longer and assist with snow shedding due to its properties.
- b. **Liner Fabric:** 15 oz per square yard high gloss finish vinyl coated polyester fabric. The structure will be manufactured with blue liner 3m high along the sides of structure, and the remainder being white.
- c. **Insulation:** Hi-performance reflective insulation with an E-value of 0.03 and an average R-value of 10. The insulation is constructed of 2 layers of polyethylene bubbles with low emissivity aluminum foil laminated on both sides. Air structure will be prepared to facilitate installing insulation between inner and outer membranes. The insulation will be installed on site by the supplier.
- d. **Sections:** The dome will be manufactured in 10 sections fastened using aluminum joining plates with velcro fastened fabric covers to the outside.
- e. **Divider Net:** No divider nets have been included. Once a layout is produced we can provide pricing. Budget for typical divider netting inside a multi-sport dome is about \$55,000.
- f. **Skylight:** We have NOT included a translucent skylight for energy efficiency in your area.

Purchaser's Initial _____
Page 2 of 8

- g. **Flame Resistance:** The outer and liner fabric have been tested for flame resistance and meet California fire marshal requirements, UL 214, NFPA 701, UBC (#42-1 & #55-5), and ULC S109 Standard for Flame Tests of Flame Resistant Fabrics and Films.
- h. **Seams and Edges:** All seams are dielectrically welded to form the dome's profile. Membrane shall be manufactured with rope edge to suit extruded profile anchoring system.
- i. **Openings:** The fabric membrane will be provided with openings to accommodate:
 - 1 - Three-leaf revolving door and one (1) pedestrian airlock combo will be provided.
 - 14 - Single-width exit doors
 - 1 - Vehicle airlock 10' x 12' x 45 ft long (Cover Included)
 - Mechanical unit openings as required

2) **DOORS AND OTHER ACCESS COMPONENTS:**

- a. **Single-Width Emergency Exits:** Supply 14 steel-framed aluminum balanced exit doors with cast-in bracing which will have a clear opening of 40". Each exit will be provided with combination emergency/exit light pack. (These units will be supplied to suit a 120-volt AC service by others).
- b. **Revolving Door / Pedestrian Airlock:** One 3 - leaf revolving door and one pedestrian airlock. Revolving door is 93" wide x 84" deep x 83" high. Doors have been specifically designed to allow easy change out of bearings. Pedestrian airlock is 86" wide x 84" deep x 83" high, **with Lexan windows and** is designed to meet CSA/ADA requirements. Pedestrian airlocks have custom attached ramps as part of door system. This airlock and revolving door are made specifically for The Farley Group. **Purchaser responsible to provide and install Fire Doors / Shutters if required OR automated operators, budget \$17,500 if required.**
- c. **Vehicle Airlock:** One (1) 45' long complete with 2 - 10' x 12' overhead doors and electric door operators with man doors. The vehicle airlock is provided with a fabric covering matching the outer fabric described above. (This unit will be supplied to suit a 120-volt AC service) **Purchaser responsible for providing power and installation of the electric door operators.**
- d. **Fire Alarm System:** There have been no provision for Fire Alarm systems by the supplier. **The Purchaser is advised to consult a Fire Protection company if required.**

3) **LIGHTING:**

- a. **Hanging Light Fixtures:** Ninety-Six (96) – 412 watt LED hanging lights c/w wire and cord ends running from fixture location to closest perimeter base (extra three feet of wire provided at attachment point of grade beam and electrician is to provide and install the plug ends to match his receptacle),
- b. **Egress Lighting:** **It is the responsibility of the Purchaser to have an egress lighting expert advise them on the local requirements. The Supplier is willing to assist with a possible solution once advised.**

All electrical work, including installation of plugs, receptacles at service attachment point, and connections to be the responsibility and to the account of the Purchaser.

4) **MECHANICAL EQUIPMENT:**

- a. **Mechanical Design Parameters:** The air structure mechanical equipment has been designed using a winter outside design temp of 18°F. Supply air volume of a minimum 32,497 cfm

- b. **Heat and Inflation Unit:** One (1) Over/Under discharge configuration, indirect fired natural gas HEAT AND INFLATION UNITS each with 4.00 million BTU output. Voltages to suit 480 volt 3 phase.
- c. **Standby Inflation Unit & Generator** – Single BI-491 fan stand by unit and electric motor and 80 KW Generator with transfer switch and life safety.
- d. **Air Conditioning:** Four (4) 50 ton Air Conditioning units with custom duct attachment
- e. **Remote Control Panel with Wind and Snow Sensors:** The remote control panel will incorporate all necessary switching, indicator lights, auto/manual pressure controls, thermostats and pressure indicators to control the heating, cooling and pressure in the dome. **System senses wind conditions and snow accumulation Purchaser to determine and install at mounting location of control panel and provide all wiring from mechanical units to mounting location. All wiring, including network wiring for internet connection to control panel and connections to be completed by Purchaser. With respect to the Wind Sensor contractor responsible to install the appropriate tower OR affix to outdoor light pole.**

Note: 4 a, b, c and d above all voltage to suit 3 phase 480. The Purchaser will be responsible for all conduits, electrical wiring and all natural gas connections to all heating and standby.

5) **AIR STRUCTURE RETENTION:**

- a. **Retention Channel:** Supply only 1510lf of anodized aluminum channel to be installed by grade beam contractor. **Purchaser to supply 1510lf of utility or pressure treated 2” x 4” for grade beam installation and air structure retention.**
- b. **Restraining Cables:** PVC coated restraining cables as required
- c. **Lengthwise Restraining Cables:** PVC coated restraining cables as required
- d. **Anchor Plates:** As required to match quantity of cables required

6) **OTHER HARDWARE AND SERVICES:**

- a. **Turnbuckles and Hardware Openings:** Turnbuckles and hardware for all openings for the provided components above is included.
- b. **Mechanical Start Up:** Mechanical Start-up is included. Purchaser to advise when the gas and power is connected. If extra visits are required because mechanical equipment has not been properly hooked up to proper power and fuel additional charges will apply. Owner is responsible to have a local HVAC representative on site for training. HVAC is currently 45-55 weeks for delivery from the date of confirmed site voltage (not from signed contract). Delays in providing this information will result in delivery delays. **Note: When ready to proceed we can look at current schedules as we are always exploring other to speed up timing.**

7) **SHIPPING AND HANDLING:**

- a. Shipping of the Membrane and Components included (FOB site).
- b. Shipping of the Inflation and HVAC Equipment included (FOB site).
- c. Delivery of all components to project site.

Note: Purchaser responsible for off loading profile, anchors, cast-in during the construction phase. Supplier will off load dome package at time of install.

8) **INSTALLATION:** The Supplier has provided for a complete **turnkey installation** of the Dome membrane, Insulation and Components listed above including all non-union non-prevailing wage temporary labor and equipment

6) **INSTALLATION CONDITIONS:**

- a. Site work must be completed prior to Farley technicians scheduling arrival at the site. If Farley supervisors arrive on site and are unable to start the work for any of the reasons on the above schedule the Purchaser will be responsible to pay the daily charge out rate for each of Farley Manufacturing Inc's employees plus extra room and board. Daily charge out rate is \$1,250.00 per man plus \$300.00 per man for room and board and ground transportation. In the event that delays occur due to inclement weather, the Purchaser will be responsible to pay one half the above rate. Once it is agreed on the arrival date of the Farley Manufacturing Inc. employees, the Purchaser will be responsible for additional travel costs caused by changes in the install date,
- b. Electric and natural gas services must be commissioned 30 days before installation schedule can be confirmed. The installation shall not proceed until the jobsite has been approved by the manufacturer. If temporary power and/or gas are being used the Supplier reserves the right to refuse the installation until an adequate plan is presented and approved.
- c. All electrical and natural gas connections to mechanical equipment and commissioning of generator must be completed before installation of air structure membrane can commence.
- d. If natural gas or electric is not ready, Purchaser will be responsible for the rental of the equipment.
- e. If the site is not ready for the scheduled delivery date the installation could be delayed by weeks or months depending on the time of year which will be determined by the supplier.
- f. Purchaser to confirm that concrete grade beam is at full strength.
- g. If weather or other conditions on site delay the installation process, the Purchaser will be responsible for extra costs associated with the inactivity of the Supplier's installation supervisors.
- h. The Supplier will make every effort to avoid the air structure membrane and components from getting dirty during the installation process. The Supplier will not be responsible for any protective field poly, ground coverage or cleaning of the air structure or components that may be required as a result of unfavorable site conditions.
Once it is agreed on the arrival date of the Farley Manufacturing Inc. employees, the Purchaser will be responsible for additional travel costs caused by changes in the install date.

7) **PLANS AND SPECIFICATIONS:**

- a. **Plans and Specifications:** Drawings, specifications and calculations pertaining to the foundation (grade beam) for the air structure will be provided by the supplier. **Purchaser is responsible for the Mechanical and Electrical Stamped drawings with respect to the dome portion of the project.** All additional drawings related to the dome portion of the project, with the appropriate professional stamps (if necessary) that may be required by local building officials, such as architectural site plan drawings for the air structure and/or other project elements (club house, parking, etc...) are the responsibility of the Purchaser. Review of local building codes and by-laws for permit application is the responsibility of the Purchaser. Any additional components that may be necessary to meet the building code requirements

before, after or at the time of a review by local building code officials, are considered as extras to this Contract and are not included in this price.

8) **PURCHASER'S DESIGNATE:**

- a. All tasks and other responsibilities of Purchaser herein may be delegated or outsourced by Purchaser to, or otherwise performed on behalf of Purchaser by, Purchaser's designate. However, any such delegation or outsourcing to, or other performance by, such a designate will not relieve Purchaser of any obligation hereunder, and Purchaser will at times be responsible for the activities of such designate.

Above Package Price **\$2,357,210 + State Tax**

Due to the uncertain global supply chain concerns, price increase, delays and parts availability the above price is only good for 30 days from the time of received.

Payment Terms:

- 1/3 of contract value less 10% holdback due upon execution of contract. **Note:** The original requested delivery date is predicated on the receiving the full deposit and confirmed site voltages not from date of signed contract.
 - Payment must be received within 30 days of execution
- 1/3 of contract value less 10% holdback due upon completion of fabrication of membrane
 - If the project is delayed payment must be received no later than 30 days after the originally requested delivery date to avoid increases or delays
- 1/3 of contract value less 10% holdback due upon notice of shipment
 - If the project is delayed payment must be received no later than 60 days after the originally requested delivery date to avoid increases or delays
- 10% holdback due within 30 days of signing 'Acknowledgement of Substantial Completion'

Delivery of Components to Site: On or before _____, 2024, weather permitting (eg. no rain, extreme cold or high winds). This delivery date is subject to date of execution of contract and receipt of deposit, which are expected to be returned by no later than _____, 2023.

NOTE: These global supply chain delays have been factored into the timing of our delivery date, however if there is any significant change in the current extended lead times we are seeing it could lead to unforeseen delays in the delivery date.

General: the air structure package supplied as per items 1 - 6 will perform satisfactorily at this location for the intended use.

Please note concrete grade beam must be completed 30 days before the install of the membrane to ensure concrete is at full strength. Purchaser to notify Supplier of scheduled concrete grade beam installation.

Note: The parties agree that labour rates will be increased if delays beyond the Supplier's control force installation into winter weather conditions.

Purchaser's Initial _____
Page 6 of 8

Responsibility of the Purchaser

- a) Obtaining and paying for all permits, including permit requirements for all other plans and specifications, including but not limited to Architectural, Structural, mechanical and electrical stamped drawings relating to the air structure membrane.
- b) All additional drawings, with the appropriate professional stamps (if necessary) that may be required by local building officials, such as but not limited to, architectural site plan drawings for the air structure and/or other project elements (club house, parking, etc...).
- c) Review of local building codes and by-laws for permit application. Any additional components that may be necessary to meet the building code requirements before, after or at the time of a review by local building code officials, are considered as extras to this Contract and are not included in this price.
- d) Installation of 10' x 12' overhead doors on the vehicle airlock.
- e) Commissioning site and soil surveys.
- f) Excavation, site grading and landscaping.
- g) Any field protection, poly or required cover for spreading the dome.
- h) Any building connections or connections to walkways, front of building, tunnels or otherwise.
- i) Supply and install of Fire shutter at the 3-leaf revolving door or automated operators where required.
- j) Supply and install Egress Lighting that may be required by code or local building officials beyond the standard emergency exit lights provided at each exit door including but not limited to any Fire Alarm systems that may be required.
- k) Furnishing and placement of concrete grade beam, equipment pads, and all concrete work required to meet plans and specifications. The Supplier will have provided construction drawings as part of this contract. These drawings are for the use of the Purchaser in constructing the grade beam and other concrete components related to the air-supported structure. **If inspections by a structural engineer are required of the work being performed by the Purchaser to ensure conformity with these plans, the resulting cost will be borne by the Purchaser.**
- l) Providing electrical plans, panels, distribution, receptacles, and all electrical hookups as required.
- m) Additional Warranty and/or Service Coverage on HVAC if the project is delayed.
- n) Providing electrical and natural gas connection to the furnace and standby.
- o) Signing 'Substantially Complete' form prior to **any** usage of the facility, including confirmation of Purchaser's insurance coverage (see Appendix "C" attached).

Responsibility of the Supplier

- a) Supervisory personnel to direct installation.
- b) Supply of non-union, non-fare wage, non-prevailing wage temporary labour and equipment to effect installation of air structure and equipment.
- c) Structural Stamped Construction Drawings for the dome portion of the project. **Purchaser to supply Mechanical and Electrical Stamping**
- d) Delivery of all components to project site. **Purchaser responsible for off loading.**
- e) Startup and operational check of furnace, inflator, and emergency backup systems.
- f) Inflation and stabilization of air structure.
- g) Operational instruction and review of Operating & Maintenance Instruction Manual requirements with Purchaser.
- p) Provide Farley Manufacturing Inc. fabrication 3 year warranty.

OTHER CONSIDERATIONS

- A) Title does not pass to the Purchaser until payment is received in full.
- B) This Contract cannot be altered, modified and/or abridged in any way without prior written agreement from both parties.
- C) This Contract contains all the covenants and agreements of the parties with respect to the product(s). All amendments to or modifications of this Contract will be made in writing to be approved (signed) by all parties hereto.
- D) Purchaser is responsible for all site preparations and site access.
- E) Any dispute resolution regarding this Contract will be under the laws of **OK**
- F) Slight variations in fabric coating thicknesses are standard. This may be apparent in bright sunlight as shading or color variation between fabric panels in translucent membranes. This is normal and has no bearing on the true color of panels.
- G) Purchaser is responsible for all costs to install the grade beam and equipment pads, including mechanical equipment pad, door pads and airlock slabs, winch concrete bases, perimeter drainage, field surfacing, handicap access, etc. as may be required. Any costs relating to site visits required by the Purchaser relating to the provided stamped construction drawings will be the responsibility and the cost of the Purchaser.
- H) The Purchaser agrees that the above detailed Scope of Work will take precedent and supersede all other Contracts that relate to the dome portion of the project. It clearly identifies what the Supplier has agreed to supply, deliver and install.
- I) The Purchaser agrees to sign Supplier's 'Substantial Completion' in the form attached prior to use of the air structure for any purpose whatsoever.
- J) The Purchaser agrees that any requirements for Union Labour and/or legislated premium rates will be a direct, additional cost to the Purchaser.
- K) This agreement shall be governed by and constructed in accordance with laws of the State or Province, without regard to principles of conflicts of law.
- L) Warranty: The dome and component parts are only warranted as set forth in the Supplier's printed warranty, a copy of which has been delivered to Purchaser (or Purchaser's Designate) or the manufacturer's warranty. To become effective, the Supplier's warranty requires that payment in full of the Contract price be made in accordance with the terms of this Contract. Period of warranty coverage commences from date of signing 'Substantial Completion' or date of inflation of air structure, whichever occurs first.
- M) Force Majeure: Supplier will not be in breach of this Contract if it does not perform any obligation hereunder due to, or otherwise suffer any liability to the Purchaser as a result of, any event or condition not under its reasonable control.
- N) Any changes to this Contract will be made by completing a change order form.

A COMPARISON OF THE ECONOMIC RETURN AND THE FINANCIAL RETURN

Oklahoma Athletics Commission - 12U Baseball Tournament (3 Day Event Fri-Sat-Sun)

Context

All 24 teams that participated in the 3 day event were from outside the local area. The average number of players per team was 12. All players were accompanied by a minimum of 2 adult family members (parents / grandparent combination), the average size of the contingent associated with each team, including players, was 36. Because this was a “Pool-Play into (2 separate) Single Elimination Brackets-Sunday Play”, the length and time that the teams stayed in the community were 2 “Overnight Trippers” (Fri-Sat) and 1 “Day Tripper (Sun).

Economic Return

- **Total Expenditures: \$190,944.00**
 - Total expenditures in the local area by players and their families: \$190,944.00 OR
 - Total Economic Impact On Sales: \$190,944.00
 - **Total Economic Impact Event Personal Income: \$13,356.40**
 - \$11,756.40 Salary Staffing + \$1,600.00.00 Part-Time Staffing
- **Total Economic Impact Annual Personal Income: \$736,000.00**
 ■ **\$116,000.00 Salary Staffing + \$620,000.00 Salary Officials Staffing**

Financial Return

- **Income: \$26,544.00**
 - Municipality Parks & Recreation, Oklahoma Athletics Commission or Local User Groups from entry fees, gate fees and concession sales.
- **Cost: \$13,356.40**
 - Cost incurred by the Municipality Parks & Recreation, Oklahoma Athletics Commission or Local User Groups, including manpower, to host the 3 day event.
- **Net Financial Gain: \$13,187.60**
 - Municipality Parks & Recreation, Oklahoma Athletics Commission or Local User Groups.

Pay-Back Period

The cost of constructing the Multi-Sport-Facility (baseball, softball, soccer, football (flag/tackle) is still in the budgeting phase projected at \$5 million. Based on the economic return to residents in terms of personal income, the capital cost of the multi-sport-facility would be repaid after a total of 374.5 similar events or tournaments hosted by the Municipality Parks & Recreation, Oklahoma Athletics Commission or Local User Groups. Event or tournaments averaging 8 months of play or 32 weekend events annually would facilitate a Multi-Sports-Facility pay back after 15.6 years.

- Total Economic Impact Event Personal Income: \$13,356.40
- Estimated Multi-Sport-Facility Construction Budget: \$5M
- $\$13,356.40 / \$5M \text{ Budgeted} = 374.3 \text{ Events / Tournaments}$
 - 32 Events / Tournaments Annually
 - 15.5 Years

Oklahoma Athletics Commission 24 Team (1 Quad w/4 Fields) Gameday Management

A COMPARISON OF THE ECONOMIC RETURN AND THE FINANCIAL RETURN*Oklahoma Athletics Commission - 2024 Baseball Tournament Schedule (3 Day Event Fri-Sat-Sun)***Context**

22 Tournaments / Events 2024 March-July.

All $24 \times 22 = 528$ teams that participated in the 66 days of the event were from outside the local area. The average number of players per team was 12. All players were accompanied by a minimum of 2 adult family members (parents / grandparent combination), the average size of the contingent associated with each team, including players, was 36. Because this was a "Pool-Play into (2 separate) Single Elimination Brackets-Sunday Play", the length and time that the teams stayed in the community were 2 "Overnight Trippers" (Fri-Sat) and 1 "Day Tripper (Sun).

Economic Return

- **Total Expenditures: $\$190,944.00 \times 22 = \$4,200,768.00$**
 - Total expenditures in the local area by players and their families: $\$190,944.00 \times 22$
 $\$4,200,768.00$ OR
 - Total Economic Impact On Sales: $\$190,944.00 \times 22 = \$4,200,768.00$
- **Total Economic Impact Event Personal Income: $\$13,356.40 \times 22 = \$293,840.80$**
 - $\$11,756.40 \times 22 = \$258,640.80$ Salary Staffing + $\$1,600.00.00 \times 22 = \$35,200.00$ Part-Time Staffing
 - No other commercial business employee salaries considered from but should be noted the event / tournament provides additional sales industry requiring additional employees increasing local household income (hotels, restaurants, amenities...) indirect public sales.
 - **Total Economic Impact Annual Personal Income: $\$736,000.00$**
 - $\$116,000.00$ Salary Staffing + $\$620,000.00$ Salary Officials Staffing

Financial Return

- **Income: $\$26,544.00 \times 22 = \$583,968.00$**
 - Municipality Parks & Recreation, Oklahoma Athletics Commission or Local User Groups from entry fees, gate fees and concession sales.
- **Cost: $\$13,356.40 \times 22 = \$293,840.80$**
 - Cost incurred by the Municipality Parks & Recreation, Oklahoma Athletics Commission or Local User Groups, including manpower, to host the 3 day event.
- **Net Financial Gain: $\$13,187.60 \times 22 = \$290,127.20$**
 - Municipality Parks & Recreation, Oklahoma Athletics Commission or Local User Groups.

Pay-Back Period

The cost of constructing the Multi-Sport-Facility (baseball, softball, soccer, football (flag/tackle) is still in the budgeting phase projected at \$5 million. Based on the economic return to residents in terms of personal income, the capital cost of the multi-sport-facility would be repaid after a total of 17 years similar events or tournaments hosted by the Municipality Parks & Recreation, Oklahoma Athletics Commission or Local User Groups. Total Economic Impact Event Personal Income: $\$13,356.40 \times 22 = \$293,840.80$

- Estimated Multi-Sport-Facility Construction Budget: \$5M
- $\$13,356.40 \times 22 = \$293,840.80$ / \$5M Budgeted
 - 22 Events / Tournaments Annually
 - 17.01 Years

Note: The Oklahoma Athletics Commission suggests that the economic impact values established by GamePlan of Oklahoma are tremendously undervalued by 50% for night & day trippers. Given the above report the Oklahoma Athletics Commission would estimate Total Expenditures increase by from **$\$190,944.00$ to $\$381,888.00$**

(SUPPLIER)

SCOPE OF WORK

Supplier agrees to supply and deliver one custom-engineered air supported structure and all related components required. Our proposal is based on the scope of work provided by Buyer. The air supported structure will be approximately 440' long x 240' wide x 80' high. The Farley Group will deliver a full submittal package which will be reviewed and signed by Buyer. Buyer agrees to pay for such structure including the following:

1) FABRIC MEMBRANE:

a. **Outer Fabric:** vinyl coated **Opaque** polyester fabric with acrylic exterior top-coating. The exterior surface color of the fabric will be white. Note: DuPont TEDLAR can be added as an optional upgrade if requested. Tedlar is a superior top layer film providing a self-cleaning, non-stick, mark-resistant surface and allows for better snow shedding when needed.

b. **Liner Fabric:** 15 oz per square yard high gloss finish vinyl coated polyester fabric. The structure will be manufactured with blue liner 3m high along the sides of structure, and the remainder being white.

***Bid Note:** We can provide a Custom inner liner color (team color, branding color) if time permits. We have provided these services for Harvard University, Princeton University, Boston College, etc. Additional costs might apply depending on the MOQ and color but sometimes at no additional cost. This will make the facility feel more like a home, pride, and a place of their own.*

c. **Sections:** The dome will be manufactured in 4 sections fastened using aluminum joining plates with velcro fastened fabric covers to the outside.

d. **Divider Net:** Not Included.

- e. **Skylight:** Included
 - f. **Flame Resistance:** The exterior and liner fabric have been tested for flame resistance and meet California fire marshal requirements, UL 214, NFPA 701, UBC (#42-1 & #55-5), and ULC S109 Standard for Flame Tests of Flame-Resistant Fabrics and Films.
 - g. **Seams and Edges:** All seams are dielectrically welded to form the dome's profile. The membrane shall be manufactured with rope edge to suit extruded profile anchoring system.
 - h. **Openings:** The fabric membrane will be provided with openings to accommodate:
 - 1 - Three-leaf revolving door and one (1) pedestrian airlock combo
 - 12 - Emergency exit doors
 - 1 – Vehicle Airlock (10'x12'x45')
 - Mechanical unit openings as required.
- 2) **DOORS AND OTHER ACCESS COMPONENTS:**
- a. **Emergency Exit:** Supply 12 steel-framed aluminum balanced exit doors with cast-in bracing which will have a clear opening of 40". Each exit will be provided with a combination emergency/exit light pack. (These units will be supplied to suit a 120-volt AC service by others).
 - b. **Revolving Door / Pedestrian Airlock:** One 3 - leaf revolving door and one pedestrian airlock. Revolving door is 93" wide x 84" deep x 83" high. Doors have been specifically designed to allow routine maintenance. Pedestrian airlock is 86" wide x 84" deep x 83" high, **with Lexan windows and** is designed to meet ADA requirements. Pedestrian airlocks have custom attached ramps as part of the door system. The airlock and revolving door are made specifically for The Farley Group. **Buyer responsible for providing and installing Fire Doors / Shutters if required OR automated operators, budget \$17,500 if required.**
 - c. **Fire Alarm System:** There has been no provision for Fire Alarm systems by the supplier. The Buyer is advised to consult a Fire Protection company if required.
- 3) **LIGHTING:**
- a. **Hanging Light Fixtures:** Eighty-four (84) – 500-watt LED hanging lights c/w wire and cord ends running from fixture location to closest perimeter base (extra three feet of wire provided at attachment point of grade beam and electrician is to provide and install the plug ends to match his receptacle)
 - b. **Egress Lighting:** It is the responsibility of the Buyer to have an egress lighting expert advise them on the local requirements. The Supplier is willing to assist with a possible solution once advised.
- All electrical work, including installation of plugs, receptacles at service attachment point, and connections to be the responsibility and to the account of the Buyer.**
- 4) **MECHANICAL EQUIPMENT:**
- a. **Heat and Inflation Unit:** One (1) Over/Under discharge configuration, indirect fired natural gas HEAT AND INFLATION UNIT with 2.50 million BTU output. Voltages to suit 480V 3 phase.

- b. **Standby Inflation Unit** – Single BI-491 fan stand by unit and electric motor and a 70 KW Generator with transfer switch and life safety.

Note: 4a and 4b (above) voltage to suit 3 phase 480 volt. The Buyer will be responsible for all conduits, electrical wiring and all natural gas connections to all heating and standby.

5) **AIR STRUCTURE RETENTION:**

- a. **Retention Channel:** Supply anodized aluminum channel. To be installed by contractor. Buy to supply 452lf of utility or pressure treated 2" x 4" lumber for grade beam installation.
- b. **Restraining Cables:** PVC coated restraining cables included.
- c. **Lengthwise Restraining Cables:** PVC coated restraining cable included.
- d. **Anchor Plates:** Included

6) **OTHER HARDWARE AND SERVICES:**

- a. **Turnbuckles and Hardware Openings:** Turnbuckles and hardware for all openings for the provided components above is included.
- b. **Mechanical Start Up:** Mechanical Start-up is included. Buyer to advise when the gas and power is connected. If additional visits are required because mechanical equipment has not been properly hooked up to proper power and fuel additional charges will apply. Buyer is responsible for having a local HVAC representative on site for training. HVAC is currently **28-34** weeks for delivery from the date of confirmed site voltage (not from signed contract). Delays in providing this information will result in delivery delays. **Note: When ready to proceed we can look at current schedules as we are always exploring other options to speed up timing.**

7) **SHIPPING AND HANDLING:**

- a. Shipping of the Fabric Membrane and Components included (FOB site).
- b. Shipping of the Inflation and HVAC Equipment included (FOB site).
- c. Delivery of all components to project site. Buyer responsible for offloading
Note: Buyer responsible for offloading profile, anchors (cast-in during the construction phase)
Supplier will offload dome package at time of install. All items requested to be delivered to site prior to scheduled start date will have freight costs plus 15%.

- 8) **INSTALLATION:** The Supplier has provided for a complete turnkey installation of the Dome Membrane, Insulation and Components listed above including all non-union, non-prevailing wage temporary labor, and equipment.

9) **INSTALLATION CONDITIONS:**

- a. Site work must be completed prior to Farley technicians scheduling arrival at the site. If Farley supervisors arrive on site and are unable to start the work for any of the reasons or the above schedule, the Buyer will be responsible for paying the daily charge out rate for each of Farley Manufacturing Inc's employees plus extra room and board. Daily charge out rate is \$1,250.00 per man plus \$350.00 per man for room and board and ground transportation. In the event that delays occur due to inclement weather, the Buyer will be responsible to pay one half the above rate. Once it is agreed on the arrival date of the Farley Manufacturing Inc. employees, the Buyer will be responsible for additional travel costs caused by changes in the install date,

- b. Electric and natural gas services must be commissioned 30 days before installation schedule can be confirmed. The installation shall not proceed until the jobsite has been approved by the manufacturer. If temporary power and/or gas are being used the Supplier reserves the right to refuse the installation until an adequate plan is presented and approved.
- c. All electrical and natural gas connections to mechanical equipment and commissioning of generator must be completed before installation of air structure membrane can commence.
- d. If natural gas or electric is not ready, Buyer will be responsible for the rental of the equipment.
- e. If the site is not ready for the scheduled delivery date the installation could be delayed by weeks or months depending on the time of year which will be determined by the supplier.
- f. Buyer to confirm that concrete grade beam is at full strength.
- g. If weather or other conditions on site delay the installation process, the Buyer will be responsible for extra costs associated with the inactivity of the Supplier's installation supervisors.
- h. The Supplier will make every effort to avoid the air structure membrane and components from getting dirty during the installation process. The Supplier will not be responsible for any protective field poly, ground coverage or cleaning of the air structure or components that may be required as a result of unfavorable site conditions.

Once it is agreed on the arrival date of the Farley Manufacturing Inc. employees, the Buyer will be responsible for additional travel costs caused by changes in the install date.

10) PLANS AND SPECIFICATIONS:

- a. **Plans and Specifications:** Drawings, specifications and calculations pertaining to the foundation (grade beam) for the air structure will be provided by the supplier. **Buyer is responsible for the Mechanical and Electrical Stamped drawings with respect to the dome portion of the project.** All additional drawings related to the dome portion of the project, with the appropriate professional stamps (if necessary) that may be required by local building officials, such as architectural site plan drawings for the air structure and/or other project elements (club house, parking, etc...) are the responsibility of the Buyer. Review of local building codes and by-laws for permit application is the responsibility of the Buyer. Any additional components that may be necessary to meet the building code requirements before, after or at the time of a review by local building code officials, are considered as extras to this Contract and are not included in this price.

11) BUYER'S DESIGNATE:

- a. All tasks and other responsibilities of Buyer herein may be delegated or outsourced by Buyer to, or otherwise performed on behalf of Buyer by, Buyer's designate. However, any such delegation or outsourcing to, or other performance by, such a designate will not relieve Buyer of any obligation hereunder, and Buyer will at times be responsible for the activities of such designate.

Above Package Price \$2,194,241 + State Tax

Payment Terms:

- 1/3 of contract value less 10% holdback due upon execution of contract. **Note:** The original requested delivery date is predicated on receiving the full deposit and confirmed site voltages not from date of signed contract.
 - Payment must be received withing 30 days of execution.
- 1/3 of contract value less 10% holdback due upon notice of fabrication of fabric membrane.
 - If the project is delayed, payment must be received no later than 30 days after the originally requested delivery date to avoid increases or delays.
- 1/3 of contract value less 10% holdback due upon notice of shipment.
 - If the project is delayed, payment must be received no later than 60 days after the originally requested delivery date to avoid increases or delays.
- 10% holdback due within 30 days of signing 'Acknowledgement of Substantial Completion'

Delivery of Components to Site: On or before _____, 2024, weather permitting (eg. no rain, extreme cold or high winds). This delivery date is subject to date of execution of contract and receipt of deposit, which are expected to be returned by no later than _____, 2024.

NOTE: These global supply chain delays have been factored into the timing of our delivery date, however if there is any significant change in the current extended lead times, we are seeing it could lead to unforeseen delays in the delivery date.

General: the air structure package supplied as per items 1 - 6 will perform satisfactorily at this location for the intended use.

Note: Concrete grade beam must be completed 30 days prior to installation of the fabric membrane to ensure concrete is at full strength. Buyer to notify Supplier of scheduled concrete grade beam installation.

Note: The parties agree that labor rates will be increased if delays beyond the Supplier's control force installation into winter weather conditions.

Responsibility of the Buyer

- a) Obtaining and paying for all permits, including permit requirements for all other plans and specifications, including but not limited to Architectural, Structural, mechanical and electrical stamped drawings relating to the air structure membrane.
- b) All additional drawings, with the appropriate professional stamps (if necessary) that may be required by local building officials, such as but not limited to, architectural site plan drawings for the air structure and/or other project elements (club house, parking, etc...).
- c) Review of local building codes and by-laws for permit application. Any additional components that may be necessary to meet the building code requirements before, after or at the time of a review by local building code officials, are considered as extras to this Contract and are not included in this price.
- d) Installation of 10' x 12' overhead doors on the vehicle airlock.
- e) Commissioning site and soil surveys.
- f) Excavation, site grading and landscaping.
- g) Any field protection, poly or required cover for spreading the dome.
- h) Any building connections or connections to walkways, front of building, tunnels or otherwise.
- i) Supply and install of Fire shutter at the 3-leaf revolving door or automated operators where required.

- j) Supply and install Egress Lighting that may be required by code or local building officials beyond the standard emergency exit lights provided at each exit door including but not limited to any Fire Alarm systems that may be required.
- k) Furnishing and placement of concrete grade beam, equipment pads, and all concrete work required to meet plans and specifications. The Supplier will have provided construction drawings as part of this contract. These drawings are for the use of the Buyer in constructing the grade beam and other concrete components related to the air-supported structure. **If inspections by a structural engineer are required of the work being performed by the Buyer to ensure conformity with these plans, the resulting cost will be borne by the Buyer.**
- l) Providing electrical plans, panels, distribution, receptacles, and all electrical hookups as required.
- m) Additional Warranty and/or Service Coverage on HVAC if the project is delayed.
- n) Providing electrical and natural gas connection to the furnace and standby.
- o) Signing 'Substantially Complete' form prior to **any** usage of the facility, including confirmation of Buyer's insurance coverage.

Responsibility of the Supplier

- a) Supervisory personnel to direct installation.
- b) Supply of non-union, non-fare wage, non-prevailing wage temporary labor and equipment to effect installation of air structure and equipment.
- c) Structural Stamped Construction Drawings for the dome portion of the project. **Buyer to supply Mechanical and Electrical Stamping**
- d) Delivery of all components to project site. **Buyer responsible for offloading.**
- e) Startup and operational check of furnace, inflator, and emergency backup systems.
- f) Inflation and stabilization of air structure.
- g) Operational instruction and review of Operating & Maintenance Instruction Manual requirements with Buyer.
- p) Provide Farley Manufacturing Inc. fabrication 3-year warranty.

OTHER CONSIDERATIONS

- a. Title does not pass to the Buyer until payment is received in full.
- b. This Contract cannot be altered, modified and/or abridged in any way without prior written agreement from both parties.
- c. This Contract contains all the covenants and agreements of the parties with respect to the product(s). All amendments to or modifications of this Contract will be made in writing to be approved (signed) by all parties hereto.
- d. Buyer is responsible for all site preparations and site access.
- e. Any dispute resolution regarding this Contract will be under the laws of Oklahoma.
- f. Slight variations in fabric coating thicknesses are standard. This may be apparent in bright sunlight as shading or color variation between fabric panels in translucent membranes. This is normal and has no bearing on the true color of panels.
- g. Buyer is responsible for all costs to install the grade beam and equipment pads, including mechanical equipment pad, door pads and airlock slabs, winch concrete bases, perimeter drainage, field surfacing, handicap access, etc. as may be required. Any costs relating to site visits required by the Buyer relating to the provided stamped construction drawings will be the responsibility and the cost of the Buyer.

- h. The Buyer agrees that the above detailed Scope of Work will take precedent and supersede all other Contracts that relate to the dome portion of the project. It clearly identifies what the Supplier has agreed to supply, deliver, and install.
- i. The Buyer agrees to sign Supplier's 'Substantial Completion' in the form attached prior to use of the air structure for any purpose whatsoever.
- j. The Buyer agrees that any requirements for Union Labor and/or legislated premium rates will be a direct, additional cost to the Buyer.
- k. This agreement shall be governed by and constructed in accordance with laws of the State or Province, without regard to principles of conflicts of law.
- l. Warranty: The dome and component parts are only warranted as set forth in the Supplier's printed warranty, a copy of which has been delivered to Buyer (or Buyer's Designate) or the manufacturer's warranty. To become effective, the Supplier's warranty requires that payment in full of the Contract price be made in accordance with the terms of this Contract. The period of warranty coverage commences from date of signing 'Substantial Completion' or date of inflation of air structure, whichever occurs first.
- m. Force Majeure: Supplier will not be in breach of this Contract if it does not perform any obligation hereunder due to, or otherwise suffer any liability to the Buyer as a result of any event or condition not under its reasonable control.
- n. Any changes to this Contract will be made by completing a change order form.

Thank you,
FARLEY MANUFACTURING INC.

(SUPPLIER)

SCOPE OF WORK

Supplier agrees to supply and deliver one custom-engineered air supported structure and all related components required. Our proposal is based on the scope of work provided by Buyer. The air supported structure will be approximately 200' long x 120' wide x 40' high. The Farley Group will deliver a full submittal package which will be reviewed and signed by Buyer. Buyer agrees to pay for such structure including the following:

1) **FABRIC MEMBRANE:**

- a. **Outer Fabric:** vinyl coated Opaque polyester fabric with acrylic exterior top-coating. The exterior surface color of the fabric will be white. Note: DuPont TEDLAR can be added as an optional upgrade if requested. Tedlar is a superior top layer film providing a self-cleaning, non-stick, mark-resistant surface and allows for better snow shedding when needed.
- b. **Liner Fabric:** 15 oz per square yard high gloss finish vinyl coated polyester fabric. The structure will be manufactured with blue liner 3m high along the sides of structure, and the remainder being white.
Bid Note: We can provide a Custom inner liner color (team color, branding color) if time permits. We have provided these services for Harvard University, Princeton University, Boston College, etc. Additional costs might apply depending on the MOQ and color but sometimes at no additional cost. This will make the facility feel more like a home, pride, and a place of their own.
- c. **Sections:** The dome will be manufactured in 2 sections fastened using aluminum joining plates with velcro fastened fabric covers to the outside.

Buyer's Initial _____
Page 2 of 8

- d. **Divider Net:** (6) Included.
 - e. **Skylight:** Not Included
 - f. **Flame Resistance:** The exterior and liner fabric have been tested for flame resistance and meet California fire marshal requirements, UL 214, NFPA 701, UBC (#42-1 & #55-5), and ULC S109 Standard for Flame Tests of Flame-Resistant Fabrics and Films.
 - g. **Seams and Edges:** All seams are dielectrically welded to form the dome's profile. The membrane shall be manufactured with rope edge to suit extruded profile anchoring system.
 - h. **Openings:** The fabric membrane will be provided with openings to accommodate:
 - 1 - Three-leaf revolving door and one (1) pedestrian airlock combo
 - 3 - Emergency exit doors
 - 1 - Double Wide Emergency exit door
 - Mechanical unit openings as required.
- 2) **DOORS AND OTHER ACCESS COMPONENTS:**
- a. **Emergency Exit(s):** Supply (3) steel-framed aluminum balanced exit doors with cast-in bracing which will have a clear opening of 40" and (1) steel-framed aluminum balanced double wide exit door with cast-in bracing with a clear opening of 103". Doors will be provided with a combination emergency/exit light pack. (These units will be supplied to suit a 120-volt AC service by others).
 - b. **Revolving Door / Pedestrian Airlock:** One 3 - leaf revolving door and one pedestrian airlock. Revolving door is 93" wide x 84" deep x 83" high. Doors have been specifically designed to allow routine maintenance. Pedestrian airlock is 86" wide x 84" deep x 83" high, **with Lexan windows and** is designed to meet ADA requirements. Pedestrian airlocks have custom attached ramps as part of the door system. The airlock and revolving door are made specifically for The Farley Group. **Buyer responsible for providing and installing Fire Doors / Shutters if required OR automated operators, budget \$17,500 if required.**
 - c. **Fire Alarm System:** There has been no provision for Fire Alarm systems by the supplier. The Buyer is advised to consult a Fire Protection company if required.
- 3) **LIGHTING:**
- a. **Hanging Light Fixtures:** Twenty (20) – 500-watt LED hanging lights c/w wire and cord ends running from fixture location to closest perimeter base (extra three feet of wire provided at attachment point of grade beam and electrician is to provide and install the plug ends to match his receptacle)
 - b. **Egress Lighting:** It is the responsibility of the Buyer to have an egress lighting expert advise them on the local requirements. The Supplier is willing to assist with a possible solution once advised.
- All electrical work, including installation of plugs, receptacles at service attachment point, and connections to be the responsibility and to the account of the Buyer.**
- 4) **MECHANICAL EQUIPMENT:**
- a. **Heat and Inflation Unit:** One (1) Over/Under discharge configuration, indirect fired natural gas HEAT AND INFLATION UNIT with 1.00 million BTU output. Voltages to suit 480V 3

phase.

- b. **Standby Inflation Unit** – Fizer 30-1 single fan stand by unit
- c. **Air Conditioning:** One (1) 50-ton custom Air Conditioning Unit

Note: 4a and 4b (above) voltage to suit 3 phase 480 volt. The Buyer will be responsible for all conduits, electrical wiring and all natural gas connections to all heating and standby.

5) **AIR STRUCTURE RETENTION:**

- a. **Retention Channel:** Supply anodized aluminum channel. To be installed by contractor. Buyer to supply 452lf of utility or pressure treated 2" x 4" lumber for grade beam installation.
- b. **Restraining Cables:** Not required .
- c. **Lengthwise Restraining Cables:** Not required.
- d. **Anchor Plates:** Not required.

6) **OTHER HARDWARE AND SERVICES:**

- a. **Turnbuckles and Hardware Openings:** Turnbuckles and hardware for all openings for the provided components above is included.
- b. **Mechanical Start Up:** Mechanical Start-up is included. Buyer to advise when the gas and power is connected. If additional visits are required because mechanical equipment has not been properly hooked up to proper power and fuel additional charges will apply. Buyer is responsible for having a local HVAC representative on site for training. HVAC is currently **28-34** weeks for delivery from the date of confirmed site voltage (not from signed contract). Delays in providing this information will result in delivery delays. **Note: When ready to proceed we can look at current schedules as we are always exploring other options to speed up timing.**

7) **SHIPPING AND HANDLING:**

- a. Shipping of the Fabric Membrane and Components included (FOB site).
- b. Shipping of the Inflation and HVAC Equipment included (FOB site).
- c. Delivery of all components to project site. Buyer responsible for offloading
Note: Buyer responsible for offloading profile, anchors (cast-in during the construction phase). Supplier will offload dome package at time of install. All items requested to be delivered to site prior to scheduled start date will have freight costs plus 15%.

- 8) **INSTALLATION:** The Supplier has provided for a complete **turnkey installation** of the Dome Membrane, Insulation and Components listed above including all non-union, non-prevailing wage, temporary labor, and equipment.

9) **INSTALLATION CONDITIONS:**

- a. Site work must be completed prior to Farley technicians scheduling arrival at the site. If Farley supervisors arrive on site and are unable to start the work for any of the reasons on the above schedule, the Buyer will be responsible for paying the daily charge out rate for each of Farley Manufacturing Inc's employees plus extra room and board. Daily charge out rate is \$1,250.00 per man plus \$350.00 per man for room and board and ground transportation. In the event that delays occur due to inclement weather, the Buyer will be responsible to pay one half the above rate. Once it is agreed on the arrival date of the

Farley Manufacturing Inc. employees, the Buyer will be responsible for additional travel costs caused by changes in the install date,

- b. Electric and natural gas services must be commissioned 30 days before installation schedule can be confirmed. The installation shall not proceed until the jobsite has been approved by the manufacturer. If temporary power and/or gas are being used the Supplier reserves the right to refuse the installation until an adequate plan is presented and approved.
- c. All electrical and natural gas connections to mechanical equipment and commissioning of generator must be completed before installation of air structure membrane can commence.
- d. If natural gas or electric is not ready, Buyer will be responsible for the rental of the equipment.
- e. If the site is not ready for the scheduled delivery date the installation could be delayed by weeks or months depending on the time of year which will be determined by the supplier.
- f. Buyer to confirm that concrete grade beam is at full strength.
- g. If weather or other conditions on site delay the installation process, the Buyer will be responsible for extra costs associated with the inactivity of the Supplier's installation supervisors.
- h. The Supplier will make every effort to avoid the air structure membrane and components from getting dirty during the installation process. The Supplier will not be responsible for any protective field poly, ground coverage or cleaning of the air structure or components that may be required as a result of unfavorable site conditions.

Once it is agreed on the arrival date of the Farley Manufacturing Inc. employees, the Buyer will be responsible for additional travel costs caused by changes in the install date.

10) PLANS AND SPECIFICATIONS:

- a. **Plans and Specifications:** Drawings, specifications and calculations pertaining to the foundation (grade beam) for the air structure will be provided by the supplier. **Buyer is responsible for the Mechanical and Electrical Stamped drawings with respect to the dome portion of the project.** All additional drawings related to the dome portion of the project, with the appropriate professional stamps (if necessary) that may be required by local building officials, such as architectural site plan drawings for the air structure and/or other project elements (club house, parking, etc...) are the responsibility of the Buyer. Review of local building codes and by-laws for permit application is the responsibility of the Buyer. Any additional components that may be necessary to meet the building code requirements before, after or at the time of a review by local building code officials, are considered as extras to this Contract and are not included in this price.

11) BUYER'S DESIGNATE:

- a. All tasks and other responsibilities of Buyer herein may be delegated or outsourced by Buyer to, or otherwise performed on behalf of Buyer by, Buyer's designate. However, any such delegation or outsourcing to, or other performance by, such a designate will not relieve Buyer of any obligation hereunder, and Buyer will at times be responsible for the activities of such designate.

Above Package Price \$630,291 + State Tax

Buyer's Initial _____
Page 5 of 8

Payment Terms:

- 1/3 of contract value less 10% holdback due upon execution of contract. **Note:** The original requested delivery date is predicated on receiving the full deposit and confirmed site voltages not from date of signed contract.
 - Payment must be received within 30 days of execution.
- 1/3 of contract value less 10% holdback due upon notice of fabrication of fabric membrane.
 - If the project is delayed, payment must be received no later than 30 days after the originally requested delivery date to avoid increases or delays.
- 1/3 of contract value less 10% holdback due upon notice of shipment.
 - If the project is delayed, payment must be received no later than 60 days after the originally requested delivery date to avoid increases or delays.
- 10% holdback due within 30 days of signing 'Acknowledgement of Substantial Completion'

Delivery of Components to Site: On or before _____, 2024, weather permitting (eg. no rain, extreme cold or high winds). This delivery date is subject to date of execution of contract and receipt of deposit, which are expected to be returned by no later than _____, 2024.

NOTE: These global supply chain delays have been factored into the timing of our delivery date, however if there is any significant change in the current extended lead times, we are seeing it could lead to unforeseen delays in the delivery date.

General: the air structure package supplied as per items 1 - 6 will perform satisfactorily at this location for the intended use.

Note: Concrete grade beam must be completed 30 days prior to installation of the fabric membrane to ensure concrete is at full strength. Buyer to notify Supplier of scheduled concrete grade beam installation.

Note: The parties agree that labor rates will be increased if delays beyond the Supplier's control force installation into winter weather conditions.

Responsibility of the Buyer

- a) Obtaining and paying for all permits, including permit requirements for all other plans and specifications, including but not limited to Architectural, Structural, mechanical and electrical stamped drawings relating to the air structure membrane.
- b) All additional drawings, with the appropriate professional stamps (if necessary) that may be required by local building officials, such as but not limited to, architectural site plan drawings for the air structure and/or other project elements (club house, parking, etc...).
- c) Review of local building codes and by-laws for permit application. Any additional components that may be necessary to meet the building code requirements before, after or at the time of a review by local building code officials, are considered as extras to this Contract and are not included in this price.
- d) Commissioning site and soil surveys.
- e) Excavation, site grading and landscaping.
- f) Any field protection, poly or required cover for spreading the dome.
- g) Any building connections or connections to walkways, front of building, tunnels or otherwise.

- h) Supply and install of Fire shutter at the 3-leaf revolving door or automated operators where required.
- i) Supply and install Egress Lighting that may be required by code or local building officials beyond the standard emergency exit lights provided at each exit door including but not limited to any Fire Alarm systems that may be required.
- j) Furnishing and placement of concrete grade beam, equipment pads, and all concrete work required to meet plans and specifications. The Supplier will have provided construction drawings as part of this contract. These drawings are for the use of the Buyer in constructing the grade beam and other concrete components related to the air-supported structure. **If inspections by a structural engineer are required of the work being performed by the Buyer to ensure conformity with these plans, the resulting cost will be borne by the Buyer.**
- k) Providing electrical plans, panels, distribution, receptacles, and all electrical hookups as required.
- l) Additional Warranty and/or Service Coverage on HVAC if the project is delayed.
- m) Providing electrical and natural gas connection to the furnace and standby.
- n) Signing 'Substantially Complete' form prior to **any** usage of the facility, including confirmation of Buyer's insurance coverage.

Responsibility of the Supplier

- a) Supervisory personnel to direct installation.
- b) Supply of non-union, non-fare wage, non-prevailing wage temporary labor and equipment to effect installation of air structure and equipment.
- c) Structural Stamped Construction Drawings for the dome portion of the project. **Buyer to supply Mechanical and Electrical Stamping**
- d) Delivery of all components to project site. **Buyer responsible for offloading.**
- e) Startup and operational check of furnace, inflator, and emergency backup systems.
- f) Inflation and stabilization of air structure.
- g) Operational instruction and review of Operating & Maintenance Instruction Manual requirements with Buyer.
- o) Provide Farley Manufacturing Inc. fabrication 3-year warranty.

OTHER CONSIDERATIONS

- a. Title does not pass to the Buyer until payment is received in full.
- b. This Contract cannot be altered, modified and/or abridged in any way without prior written agreement from both parties.
- c. This Contract contains all the covenants and agreements of the parties with respect to the product(s). All amendments to or modifications of this Contract will be made in writing to be approved (signed) by all parties hereto.
- d. Buyer is responsible for all site preparations and site access.
- e. Any dispute resolution regarding this Contract will be under the laws of Oklahoma.
- f. Slight variations in fabric coating thicknesses are standard. This may be apparent in bright sunlight as shading or color variation between fabric panels in translucent membranes. This is normal and has no bearing on the true color of panels.
- g. Buyer is responsible for all costs to install the grade beam and equipment pads, including mechanical equipment pad, door pads and airlock slabs, winch concrete bases, perimeter drainage, field surfacing, handicap access, etc. as may be required. Any costs relating to site visits required by the Buyer relating to the provided stamped construction drawings will be the responsibility and the cost of the Buyer.

- h. The Buyer agrees that the above detailed Scope of Work will take precedent and supersede all other Contracts that relate to the dome portion of the project. It clearly identifies what the Supplier has agreed to supply, deliver, and install.
- i. The Buyer agrees to sign Supplier's 'Substantial Completion' in the form attached prior to use of the air structure for any purpose whatsoever.
- j. The Buyer agrees that any requirements for Union Labor and/or legislated premium rates will be a direct, additional cost to the Buyer.
- k. This agreement shall be governed by and constructed in accordance with laws of the State or Province, without regard to principles of conflicts of law.
- l. Warranty: The dome and component parts are only warranted as set forth in the Supplier's printed warranty, a copy of which has been delivered to Buyer (or Buyer's Designate) or the manufacturer's warranty. To become effective, the Supplier's warranty requires that payment in full of the Contract price be made in accordance with the terms of this Contract. The period of warranty coverage commences from date of signing 'Substantial Completion' or date of inflation of air structure, whichever occurs first.
- m. Force Majeure: Supplier will not be in breach of this Contract if it does not perform any obligation hereunder due to, or otherwise suffer any liability to the Buyer as a result of any event or condition not under its reasonable control.
- n. Any changes to this Contract will be made by completing a change order form.

Thank you,

IN THE UNITED STATES DISTRICT COURT
FOR THE MIDDLE DISTRICT OF FLORIDA
ORLANDO DIVISION

BRIAN WEGMAN,
THOMAS HORROM
Plaintiffs,)
V.) CASE NO. 23-1637
)
THE UNITED STATES SPECIALTY) JURY TRIAL DEMANDED
SPORTS ASSOCIATION, INC.,)
DONALD DEDONATIS, III,)
RICHARD FORTUNA,)
WENDY ANDERSON,)
COURTNEY CEO, AND)
JACOB HORNBACHER,)
Defendants.)

10. Defendant United States Specialty Sports Association, Inc. is a 501(c)(4) Not-for-Profit corporation headquartered in Melbourne, Florida (hereinafter referred to as "USSSA"). USSSA was founded in 1968 in Petersburg, Virginia. In 2017, USSSA moved to its current headquarters in Melbourne, Florida.

11. USSSA is the world's largest multi-sport athletic organization and has more than 4 million participants competing across multiple nationally sanctioned sports, including baseball, fastpitch and slowpitch softball, basketball, golf, and lacrosse. USSSA maintains a network of more than 3,500 directors who oversee USSSA-sanctioned sporting events and provide support for USSSA athletes and participants. USSSA Employee Handbook, Section 1.1 History.

12. USSSA generates revenue from sanctioned and hosted events that operate (i) under the supervision of USSSA Directors, who are independent contractors and are not employees of USSSA, or (ii) by employees of USSSA. USSSA By-Laws, Article II, Section 3. USSSA generates approximately \$20 million in revenues each year. **USSSA AREA DIRECTORS**

13. USSSA revenues derive from five principal sources: (1) membership registration fees for teams to join leagues and events sanctioned by USSSA; (2) specific event fees and sanctioned-event fees paid by USSSA Directors; (3) sales of insurance products to teams for facilities, player accident, and general liability (earned through referral fees which are included in insurance premiums); (4) sponsorship (e.g. by companies with access to member data and marketing products) and license royalty payments (e.g., bat, ball, gloves, apparel, and awards); and (5) event income generated from USSSA-sponsored events, principally at the Space Coast Complex in Brevard County, Florida (e.g., participant fees, livestream, and gate/ticket fees). USSSA also owns Florida Pride, Inc. ("Florida Pride"), a professional women's fastpitch softball team, which plays its home games at the Space Coast Complex. USSSA, through various for-profit and not-for-profit entities, leases from Brevard County and operates The Space Coast Complex, which consists of the Space Coast Stadium, 15 separate AstroTurf fields, 15 scoreboards, three high-definition video boards, and advanced broadcast capabilities.²

LITERATURE REVIEW

2

Economic impact is a broad term that can have a significant local impact for communities and youth group associations. “Community leaders need to be able to estimate the annual economic impact that comprehensive sports programs generate in their communities” (Freeman & Brewer, 2017). I have found over the last fifteen years, most community stakeholders know the value of the outside dollars circulating in their local community, but rarely do they understand how statistical data was arrived. “It is critical to recognize who qualifies as an event tourist so that only the spending from those individuals can be included in economic calculations” (Tyler, Morse & Cook, 2017).

Most stakeholders believe that the entity providing the information is an expert and consider their findings at face value. The same conclusion can be drawn about how we as researchers can find information from valuable sources (such as journals and peer-reviewed articles). However, since almost all studies estimate that the daily attendance rate will increase in dollars given statistics for a given event or movement, stakeholders are making decisions based on a limited understanding of knowledge.

My entire graduate program study has been geared specifically to help aid in building a memorial sports complex for my son. This road has taken me down many paths as I tried to understand the value of a sports complex to a local community and what would motivate stakeholders to partner with the Brian Crawford Memorial Foundation. It is my belief that if stakeholders truly understand economic impact and how the data drives their decisions can be misleading if not done properly and addressing their specific community.

As early as 2010, I began tracking statistical data for specific annual baseball events in Ardmore, Oklahoma. Each year, a tournament director hosts three separate events divided by age groups 10U, 11U and 12U on separate weekends with a maximum capacity of 64 teams per

3

weekend. The advantage I held over any of the other studies is that I have precise information for all participants. This information is very valuable as now the statistical data is not an estimate of daily attendance. The precise additional information includes the number of nights of accommodation and meals for each player's family. Other studies are complicated by soliciting second- or third-party data that cannot be validated other than an educated guess or estimation. Another key advantage I had implemented was a voluntary survey that teams could submit electronically to aid my efforts to provide accurate economic impact statistics.

My study of economic impact as it pertained to my early on goals opened up an avenue of possibility to find a home for a sports complex. Financial statistics have been reported by others that only scratch the surface of my findings. As time went on, I quickly realized my independent limited knowledge was inadequate and began to educate myself on the process. One big finding for me personally was the amount of revenue an event can generate for a local community that does not financially benefit a local association or tournament director. This scenario was the limiting factor on why I could not just run out to a bank and get a loan to build a sports complex. It is very difficult for an owner operator to self-sustain financially to cover all the business expenses to operate. Thus, this fact is usually a defining factor as to the need for communities passing bonds or tourism tax to cover the capital investment.

Specific records such as accurate daily attendance should be scrutinized and documented as a source data that drives the study rather than estimates. It is only then stakeholders can make an informed decision as to the benefits of forecasting annual budgets, capital improvements or new construction.

Economic impact studies often use the dollar amount as a variable for daily attendance, depending on the sub-category designation of night or day visitors. These values are again

estimates, depending on their geographic area or the data collected by the party responsible for the survey, which rarely reflects the local market or economy. “In the inevitable absence of perfect information, economic impact analyses are complicated by the process of estimating the required inputs where facts are unknown” (Freeman & Brewer, 2017). This is back to my original idea of the value of specific information that I can also access, and most researchers classify it as unknown data.

My proposal of economic impact study would solicit information directly from coaches who usually delegates to a parent for a specific point of contact for their team. A great source for information as I have found that coaches are somewhat unreliable and do not handle that sort of information. “Surveys and questionnaires have an advantage of being brief and easy to administer” (Williams & Riley, 2003). The electronic survey solicits a point of contact and specifically request the number of hotel rooms per night for their team, amount spent on meals, entertainment, lodging, local shopping, etc. “Tourist spend money on events, lodging, food, transportation, and more, which represents the direct economic benefit from tourism” (Tyler, Morse & Cook, 2017).

This will allow me to compare the reported data per hotels given to the tourism department to validate overnight visitors. This validation is critical as hotels rarely are accurate on their reports. This conflict is further evidence as the difficulty to obtain factual numbers as it almost appears the data disappears in a cloud and reinforces estimations for data.

The study of economic impact should be precise and conducted with transparency. This issue creates a concern for the cost of a study and the amount of time required or allocated to the research. I understand my position is unique and fueled by passion for a higher calling and an effort committed to details. One detail that should be specifically addressed is the social benefits

LITERATURE REVIEW

5

of the education community, which are not equivalent to measurable dollars. “These impacts include social cohesion in the local communities, event management skills, and greater interest of students in sports activities” (Somphong, 2020).

My literature review covered 10 separate journal articles and coupled with my ongoing experience. It is evident to me that youth sports is a big business that generates an enormous amount of money into a local economy. Partnerships between all benefactors should be managed and nurtured with care to facilitate a long rewarding relationship. A new facility alone will not sustain a steady daily attendance for the life of the complex. It is that partnership and working together with tourism, parks and recreation, hotel and restaurant associations, youth associations, and city leaders that generate a sustainable economic impact bringing in new money. The first step in my opinion for economic impact is in community education and sharing the vision. Surprisingly, this aspect was seldom mentioned in my literature review, and I believe is undervalued.

The results of my research will be submitted to the Ardmore Tourism Bureau as an independent study that will provide factual statistics on the economic benefits of the three designated annual events. This report will also help further our Foundation’s goal of providing evidence of the benefit partnering with the Brian Crawford Memorial Foundation.

MARKET ANALYSIS

Market Analysis that includes some of the surrounding complexes. The information pertains to usage fees for field rentals, concession stand operation arrangements and similar items. Data was collected from fourteen different facilities located within 2-3 hours from the Seminole State College area: Ardmore, Cashion, Choctaw, Del City, Edmond, Moore, Mustang, MWC, Owasso, Seminole, Stillwater, Tulsa, University of Central Oklahoma, and University of Oklahoma. Many facilities are city owned and operated for economic impact and tourism dollars.

Ardmore, OK: The relationship with the City of Ardmore, Ardmore Tourism, Chamber of Commerce, and Shootout Baseball is one with mutual understanding and support. The Oklahoma-Texas Shootout is an annual event and is in its 21st year. Huge economic impact as the Chamber & Tourism covered \$12K in usage fees for three events / weekends in April 2021. Friday night field usage is \$100 per field with Saturday & Sunday at \$200 per field/day. Shootout Baseball is also allowed to run for their own concession stand for profit. This started years ago and out of necessity as the local user group would not participate in concession sales and the City of Ardmore had no interest in operations at the time for a one weekend event. Now, it provides meals for officials and staff and makes a nice profit.

8 Fields w/Lights – Friday \$100 per field / Sat \$200 per field / Sun \$200 per field

Cashion, OK – Cashion High School has 1 field with lights and leases \$100 per game. The concession stand operation is run by the High School Baseball Booster Club. The “TD” (Tournament Director) is responsible for managing the admissions gate (or here of late charging a team gate fee) and responsible for the hiring and paying officials, game management support and possibly field supervisor or field workers. There is usually very little profit if any on gate admissions vs paying officials. The concession stand operations is the profit and fundraising incentive for the local baseball booster club who is also able to

staff personnel with parental volunteer help.

1 Field – Friday \$100 per field / Sat \$100 per field / Sun \$100 per field

Choctaw, OK – Bouse Sports Complex (Owner City of Choctaw) is an 8 field (all infields) artificial turf – 225' field dimensions. Lack of maintenance and care has seen the facility degrade in the last few years. Water does not drain off 2 of 8 infields and field lighting is inoperative on one of the fields.

8 Fields – Friday \$100 per field / Sat \$180 per field / Sun \$180 per field

Del City, OK – Del City Ballpark is a very old complex with 9 playing surfaces. Facility is independently owner / operator partly leased from the local VFW. Tournaments are mostly free at this facility with mostly local area teams participating. Concession and gate is operated for a profit by the owner / operator who allows outside tournament directors to use the facility at no charge to bring in business.

9 Fields – Friday \$0.00 per field / Sat \$0.00 per field / Sun \$0.00 per field

Edmond, OK – Until recently, Edmond All-Sports Association had been contracted to manage the youth sports program and facilities within the City of Edmond. EASI does not lease out their facilities and host their own events. Concession operations via EASI – Edmond All-Sport Association or new management support user group.

Moore, OK – Buck Thomas Complex is an older complex with 6 playing surfaces. The facility is operated by the local youth organization that operates with a lease agreement with the City of Moore. The concession stand is operated by the local youth organization. The gate arrangement is negotiable depending on if a league sponsored event or leasing the fields to outside parties for the

weekend. 6 Fields – Friday \$125.00 per field / Sat \$125.00 per field / Sun \$125.00 per field

Mustang, OK – Mustang Sports Complex has 11 playing surfaces. The facility is

operated by the local youth organization with a lease agreement with the City of Mustang. The concession stand is operated by the local youth organization. The Gate arrangement is negotiable depending on if a league sponsored event or leasing the fields to outside parties for the weekend.

4 Games or Less - 11 Fields – Friday \$100.00 per field / Sat \$100.00 per field / Sun \$100.00 per field

5 Games or More - 11 Fields – Friday \$200.00 per field / Sat \$200.00 per field / Sun \$200.00 per field

MWC, OK – Reed Park is a very old complex with 4 playing surfaces and for 2022 is expected to have all infield turf installed. Facility is leased from the MWC YMCA who leases the facility from the City of Midwest City. Tournaments rarely make and are mostly free at this facility with mostly local area teams. Concession and gate operated for profit by the owner / operator who allows tournament directors to use the facility at a low rate.

4 Fields – Friday \$25.00 per field / Sat \$25.00 per field / Sun \$25.00 per field

Owasso, OK – Owasso Sports Complex is a fairly new 13 field complex. The facility is operated by the local user-group with a lease agreement with the City of Owasso. The concession stand is operated by the local youth organization while the gate arrangement is negotiable on a league sponsored event or leasing the fields to outside parties for the weekend.

13 Fields – Friday \$125 per field / Sat \$125 per field / Sun \$125 per field

Seminole, OK – Seminole Sports Softball Quad & the Blake Auld Complex has 9 playing surfaces combined that need attention and upgrades. The facility is operated by the local user-group with a lease agreement with the City of Seminole. The concession stand is operated by the local youth organization while the gate arrangement is negotiable on a league sponsored event or leasing the fields to outside parties for the weekend.

9 Fields – Friday \$15.00 per GM / Sat \$15.00 per GM / Sun \$15.00 per GM

Stillwater, OK – Stillwater Sports Complex has 14 playing surfaces. The facility is

operated by the local user-group with a lease agreement with the City of Stillwater. The concession stand is operated by the local youth organization while the gate arrangement is negotiable on a league sponsored event or leasing the fields to outside parties for the weekend.

14 Fields – Friday \$15.00 per GM / Sat \$15.00 per GM / Sun \$15.00 per GM

Tulsa, OK – O'Brien Sports Complex is split with some fairly new playing surfaces and a few of the 8 playing surfaces currently being converted to turf. The facility is operated by the local user-group with a lease agreement with the City of Tulsa. The concession stand is operated by the local youth organization while the gate arrangement is negotiated.

8 Fields – Friday \$125 per field / Sat \$125 per field / Sun \$125 per field

University of Central Oklahoma – The University of Central Oklahoma has 1 field with lights and leases \$250 per game. The concession stand is rarely available or operational during leased events. The “TD” is responsible for managing the gate (or here of late charging a team gate fee) and responsible for the hiring and paying of officials, game management and possibly field supervisor / worker. There is usually very little profit if any on gate admissions vs paying officials.

1 Field – Friday \$250 per GM / Sat \$250 per GM / Sun \$250 per GM

University of Oklahoma – The University of Oklahoma has 1 field with lights and leases \$400 per game. The concession stand is rarely available or operational during leased events. The “TD” is responsible for manning the gate (or here of late charging a team gate fee) and responsible for the hiring and paying officials, game management and possibly field supervisor / worker. There is usually very little profit if any on gate admissions vs paying officials.

1 Field – Friday \$400 per GM / Sat \$400 per GM / Sun \$400 per GM

Conclusion
