4. Facility Context & Research Interpretation

Methodology

Calculated Team Entry Fees = Number of Participating Teams x Publicly Posted Team Entry Fee. The calculation is performed at the applicable event-record level and aggregated for analysis. If the public record displays a \$0.00 Team Entry Fee, the dataset records \$0.00 rather than imputing an unsupported fee.

The report separates direct stand-alone activity, associated multi-facility activity, and the combined documented footprint. Separate facility reports should not simply be summed for statewide totals because the same multi-facility event may appear in more than one facility report; statewide aggregation requires event-level deduplication.

What the public dataset establishes - and what remains unknown

Category	Meaning
Publicly documented activity	Teams, facilities, municipalities, directors, posted fees, and other fields shown in public event records.
Calculated financial activity	Participating teams multiplied by the publicly posted Team Entry Fee.
\$0.00-fee activity	Documented operational activity may exist even when the public Team Entry Fee field reports \$0.00.
Direct facility activity	Records listing the Primary Facility independently.
Associated multi-facility activity	Records identifying the Primary Facility as part of a multi-facility configuration.
Unknown financial activity	Actual collections, allocations, distributions, profits, bank deposits, tax treatment, gate/concession revenue, or d
